Any van, Kore can.

PlyBOX 2.0 – Plywood Box Wheel Arch Covers

The PlyBOX 2.0 wheel arch covers are ready assembled boxes, fitted with aluminium edges for high-end look and easy installation and handling. The PlyBOXes are fixed to the van chassis with screws i.e. through the lining panels.

The PlyBOX wheel arch cover boxes are designed to maximize the cargo space, but also to enable storage on or in the box. For many models they will come in two heights “Low” & “High” and are designed to fit perfectly over the wheel arch of the van. The most models are covering multiple van lengths.

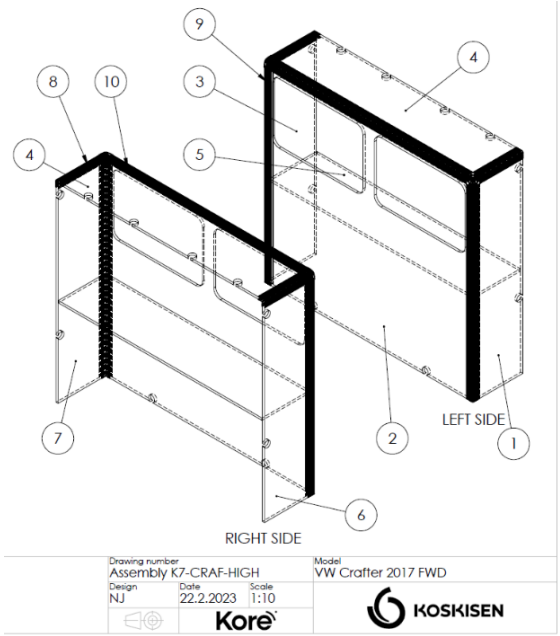

PlyBoxes are available in 9mm Kore® van floor materials.

- 9mm KoskiCrown dark brown
- 9mm KoskiCrown silver grey
- 9mm KoskiDeck granite

Other materials available on request.

The product range is to be completed to cover all biggest van models in our portfolio.
