KoskiPly
Standard

Multipurpose plywood

KoskiPly Standard thin plywood sheets are made from rotary cut birch veneers. As surface veneer, 0.5 mm thick rotary cut, unpatched sound surface veneer. 1.5 mm thick rotary cut veneers are used as core veneers.

The veneers are laid in such a way that the grain directions of the overlapping veneers are perpendicular to each other. Cross lamination makes plywood strong and therefore suitable for many applications.

EASY MACHINING

MULTI USE

EASY TO USE

- Homogeneous surface of a consistent high quality
- Versatile panel for multi-use
- High quality birch plywood for many applications
- Smooth surface quality
- Easy to work

The focus areas of product development are improving the long service life, renewability, safety, and traceability of products. Read more: koskisen.com/sustainability

Additional information

Wood is a living material and every panel is unique. Therefore a photograph or a sample piece cannot represent a full sized panel as regards colours, shades, figure, knots etc. Please note that a slight colour variation is accepted between panels.

The information, although based on extensive testing, is intended as a guideline only and comes without warranty. We reserve the right to amend specifications without notice. Any defects other than those caused by clearly verified production or service faults by the supplier are the responsibility of the user. Any claim for compensation is limited to the value of the defective panels. The Seller makes no guarantee that the goods are fit for a particular purpose, unless it provides a written declaration of their suitability.
